

TestTalker is a software solution designed to help individuals be more successful with test taking, worksheet completion, and study materials. It also aids completion of electronic forms. TestTalker provides a computerized version of a test, worksheet, or other form that can talk.

Freedom Scientific's Learning Systems Group is pleased to introduce a partnership between Don Johnston's Start-to-Finish® Books and LSG's TestTalker. The extremely popular Start-to-Finish Books provide a controlled reading experience with a bi-modal auditory and visual feedback. Now users of Start-to-Finish Books will be able to download the quizzes in TestTalker format, free of charge.

TestTalker™ Data Sheet

TestTalker is used for both test preparation and standardized tests. To assist our users with test creation, Freedom Scientific's Learning Systems Group is pleased to introduce a partnership between Don Johnston's Start-to-Finish® Books and LSG's TestTalker. Users of the popular Start-to-Finish Books will be able to download quizzes in TestTalker format, free of charge.

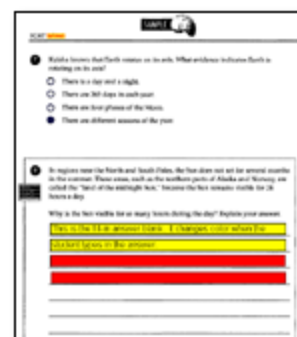

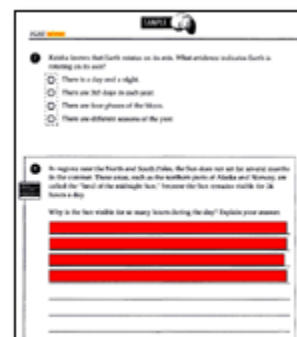

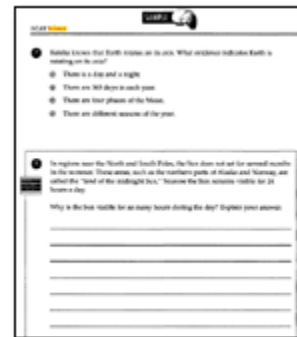

TestTalker is a software solution to help individuals be more successful with test taking, worksheet completion, and with study materials. It can also help people complete forms electronically. TestTalker provides a computerized version of a test, worksheet, or other form that can talk. TestTalker uses the same bimodal approach-simultaneously highlighting words as they are spoken aloud-that is used in WYNN, the Learning Systems Group's other product.

With mandated requirements for standardized testing and accountability, this is an option that teachers and students will find welcome and useful.

TestTalker maintains the integrity of the written test by not modifying the test. TestTalker is an accommodation tool that provides a bimodal presentation of the unmodified written information.

TestTalker has two modules: the Teacher Edition, a test-creating module designed for teachers; and the Student Edition, a test-taking module. The Teacher Edition scans pre-printed tests and allows teachers to configure them so students can complete the tests electronically. The Student Edition reads the test aloud and allows students to answer the questions. Teachers and students can print the blank or completed tests if they wish.

TestTalker supports True/False, Multiple Choice, Fill-in, and Extended Answer tests. The product includes a PDF (Adobe® Portable Document Format) converter so teachers can simply open a PDF file in TestTalker without needing to scan.

TestTalker is valuable in helping students become better prepared for test-taking. TestTalker enables students to become familiar with specific testing formats. It provides a bimodal approach, which enhances learning for many students and helps empower students to feel successful. TestTalker also better prepares students for taking tests on the computer. Considering the increasing popularity of this method of test delivery, it serves as a tool for individuals to practice completing tests by computer.

TestTalker™ System Requirements

The following table lists the minimum software and hardware required to use TestTalker effectively.

Computer Type	IBM-compatible Pentium PC, 450 MHz
Operating System	Windows® 95, 98, 2000, XP, ME, or NT version 4.0 (SP6)
Video Display	A video card and monitor capable of VGA video in 800x600, high-color, 16-bit color mode or greater
Memory	92 MB of RAM
